ACADEMIC PERIODS	Regular		
REQUIREMENTS	Environment and Building		
PROFESSOR	O. Ovalles, A. Coss, J. Delgado, M. Ochoa		

PURPOSES

Demonstrate the different cultural and physic – natural environments in which were settled the population centres of Venezuela, the process of these occupations and the urban responses of adaptation, on function of the environmental threats identified and the environmental impacts that it generates.

To teach the tools of environmental analysis on urban scale.

LEARNING OBJECTIVES

- 1.- Introduce the Architecture student in the analysis and study of the relation human settlements – environment.
- 2.- To show the historical evolution of human settlement from the perspective of human intervention of EMI exchanges of the planet.
- 3.- Provide the student with the toolset of analysis and study of the city as “second nature”.
- 4.- Characterize human settlements in the diversity eco-regional in Venezuela.

CONTENTS

TOPIC I

The environment and the human settlement. Philosophical perspectives: Ecocentrism / Anthropocentrism. Human settlement as expression of the development styles. Environment and Development: environmental management indicators of human settlements, environmental regulatory framework of development.

TOPIC II

The history of human settlement and its relation with the environment. The evolution of human intervention in EMI exchanges: Nomads Societies- agricultural societies- industrial societies- informational societies. The diversity of the current stage.

TOPIC III

The city as anthropo. Instrumental methodological perspectives for the analysis and study of the city as a second nature: urban footprint, the city as ecosystem, the city as perception field and environmental cognition.

TOPIC IV

The human settlements and the eco-regional diversity in Venezuela. The different conditions of human habitability in: Orinoquia (High and Low plain), Amazonas, Delta, Andes, Caribbean (Coasts, lakes and lagoons, intermountain valleys). Presentation of relevant PDUL [Local Development Urban Plan] cases in the management of environmental variables.

INSTRUCTIONAL STRATEGIES

- Topic 1: Seminars
- Topic 2: Seminars
- Topic 3: Workshop and seminar, fieldwork
- Topic 4: Seminar and fieldwork

EVALUATION

- Topic 1: Written evaluation, intervention in classes
- Topic 2: Written evaluation, intervention in classes
- Topic 3: Written work and presentation
- Topic 4: Written work and presentation
